

BACKSYNC by BRM

Backup and Business Continuity Solutions from the Brand Name you can Trust

BackSync  **Backup by BRM** is a disk-based backup and recovery solution that supports both local and online backup of your data on Windows, Apple, Linux and Solaris systems. BackSync Backup by BRM is the perfect choice for supplementing or replacing unreliable tape backup systems and securely backing up remote servers and laptops.

- Reduces IT costs by simplifying backup maintenance
- No hardware or appliances purchases required
- Supplements existing backup systems by providing offsite backup of your most critical information
- Long term retention makes compliance easy
- Laptop and remote office backups are ensured
- Restores files quickly and easily with the click of your mouse
- Bit level file versioning saves space and bandwidth
- Local disk and online backup for FAST backup and restore

BackSync  **Protect by BRM** provides fast and reliable disaster recovery, data protection and system migration. BackSync Protect by BRM allows you to create an exact point-in-time backup image of your entire system and data. If your server has a catastrophic failure, you can recover in minutes rather than days. Recover critical data by simply assigning any backup file a drive letter and copy and paste the files and folders you need or recover the entire system with the BackSync Recovery CD.

Traditional System Recovery

Repair hardware if necessary

Reinstall operating system
