BRM Announces BackSync Backup and BackSync Protect Services

BackSync Expected to Expand Digital RIM Offering Nationally

PITTSBURGH — November 17, 2011— Business Records Management LLC

(“BRM”) announced immediate availability of the Backsync Backup by BRM and Backsync Protect by BRM® service offering, enabling companies to capture all of their critical data and ongoing data updates through a user friendly ‘set it and forget it’ interface.

A true business grade backup solution, **BackSync by BRM** will move and store data in a highly secure environment and provide data recovery on demand through that same user-friendly interface. Quickly browse and granularly restore up to 99 versions of any live or deleted file or folder. For every backup job, you can choose how long to retain live and deleted data from as little as a day, up to ten years. Set up is quick and easy and data is managed from virtually any operating system via a web browser. Regardless of the amount of data you manage, **BackSync by BRM** is simple, fast and efficient.

John Gross, Sales Executive/Electronic Vault Specialist for BackSync by BRM, commented, “I’m excited to leverage our strong background in computer media rotation services and data center backup and recovery to help our clients take the next step toward digital protection.”

Joseph G. Gross, Director of Sales and Account Management, states, “We found that as we strengthen our foothold on the records management industry, BackSync by BRM was a value-added service that will compliment our already strong service offerings.”

BackSync by BRM Compatibility

BackSync by BRM is driven by customer demand and is part of BRM's commitment to deliver premium records management services to its existing client base and beyond. BackSync by BRM is certified for data backup from Windows, Apple, Linux, and Solaris Systems including Exchange, SharePoint, MS SQL, MySQL, Active Directory and OS X.

Business Records Management LLC ("BRM")

Founded in 1986, BRM is based in Pittsburgh, PA and services the information management needs of greater Western PA, Central PA, Northwestern PA, and surrounding areas, with plans to expand its footprint. The company offers a variety of information management services including physical document storage, secure destruction, data tape management, document imaging and data center backup services.
